Colocation

Strategic, Resilient, Agile IT Infrastructure

In an era of rapid digital transformation, IT decision-makers face numerous choices. While cloud adoption is accelerating, colocation will remain a critical part of any robust IT strategy. DC BLOX's colocation services provide the reliability, flexibility, and connectivity needed to ensure your IT infrastructure supports your business objectives.

## DC BLOX Colocation Services will help your business...

- **Enhance Reliability and Uptime:** Leverage our Tier III data centers with redundant power and cooling systems for uninterrupted uptime.
- **Strengthen Business Continuity:** Ensure disaster recovery with secure facilities and resilient network connections.
- **Enable Hybrid Cloud Solutions:** Easily connect to public cloud providers and integrate with your existing infrastructure.
- **Consolidate Data Centers:** Centralize operations in modern facilities, reducing overhead and complexity.
- **Enhance Connectivity:** Benefit from our private network for greater network options and scalability.

Custom Colocation Solutions

- **Ready-Now Solutions:** Get your IT infrastructure up and running quickly with our pre-configured, flexible options. Choose from existing designs that offer immediate access to power, cooling, and security in multiple Southeastern locations.
- **Single-Tenant Options:** For businesses needing bespoke solutions, DC BLOX offers single-tenant configurations. Tailor your colocation experience with custom data halls or standalone build-to-suit structures to meet your specific requirements.

DC BLOX will help you optimize your IT infrastructure and safeguard your operations. Visit dcblox.com or call 877.590.1684 to connect with our colocation experts.

DC BLOX offers...

- **Tier III Design:** Includes N+1 redundancy in both electrical and mechanical systems.
- **Flexible Space:** Modular enclosures with half/full cabinets and pods, supporting densities up to 30kW per rack.
- **Remote Hands and Eyes:** 24/7/365 on-site technician support for equipment reboots, circuit testing, and more.
- **Comprehensive Security:** 24/7/365 manned security with CCTV monitoring across data centers.
- **Diverse Connectivity Options:** Access to a wide range of connectivity services with our Southeast regional network.
- **Guaranteed Performance:** 100% SLA for power, temperature, and humidity.

Strategically Located, Expertly Designed

Our colocation facilities are strategically positioned in growing markets across the Southeast—ensuring secure, reliable services for businesses, universities, healthcare organizations, and government entities. Locations in Alabama, Georgia, Tennessee, South Carolina, and growing.
